

NA TRANS NATAL TRANSPORT

BACKGROUND

Natrans Natal Transport CC is based in Durban and a company specializing in abnormal loads. We have been in existence since 1987 transporting loads throughout Southern Africa, enjoying steady growth over this period.

We have an extensive knowledge of the African mining industry through delivering abnormal and special equipment to the various destinations.

Due to the requirements per individual abnormal load and extensive knowledge of the routes, we

are able to advise our clients of vehicle specifications, risk factors, specialized demarcated routes, traveling times and all other points of interest. We are able to inspect loads prior to dispatch to ensure the cargo is correctly handled from the time of loading till the time of delivery.

Being located in Durban, we are able to meet vessels docking at Durban Harbour and have easy access to Richards Bay Harbour when required. Natrans is able to coordinate cranes and riggers when necessary maximizing our service delivery.

Our Vision

We strive to be the most successful transportation company in Africa and to continually improve our market share by offering competitive rates in conjunction with superior service, optimal use of available resources, innovation and cost saving initiatives.

The company aims to maintain and grow on its high profile in the market by:

- Maintaining service excellence
- Providing superior transport solution according to each customer's needs
- Treating staff and customers with respect and honesty
- Appointing high quality staff
- Developing new and innovative ways to safely and cost effectively transport cargo across Africa
- Offering customers a dedicated, personalized service.
